THE ISSUE

The Legacy Corporation needed a simple-to-use system with the ability to ensure consistent collection, aggregation and reporting of both corporate and contractor performance data. Execview was awarded the contract in September 2013 after the Legacy Corporation found the system to be user friendly and intuitive. Execview provided a 'single version of the truth' from data sourced from throughout the organisation.

The London Legacy Development Corporation (The Legacy Corporation) is a Mayoral Development Corporation; established in April 2012 through powers provided to the Mayor of London by the Localism Act 2011. The Legacy Corporation is responsible for delivering one of the most important Olympic legacy promises made in the original London 2012 Games bid. This pledge concerns the physical legacy of the Games – the long-term planning, development, management and maintenance of the Park and its impact on the surrounding area after the London 2012 Games.

EFFICIENT, SMOOTH IMPLEMENTATION

Rachel Massey, Head of Programme Management and Governance at the Legacy Corporation recalls: "We had a really good implementation process.

who set out a clear, achievable timetable".

"One of our requirements was that implementation should be straightforward and another was that a strict timescale should be set out. We worked closely with our Execview Solutions Consultant

Another element that helped ease the transition to Execview was a pilot process. A single LLDC project was loaded into Execview so that staff could familiarise themselves with the software. Rachel explains: "The pilot process helped us gain an understanding of the product- and how our data worked in Execview".

- Proven smooth, structured and tailored implementation.
- Dedicated Execview Solutions Consultant guides you through implementation and is on-hand at all times.
- Pilot process allows you to envisage how your data will work in Execview.
- Gain solid product knowledge before Execview goes live in your organisation.

"Each area is summarised and key things you want to know are in one place. Areas of concern are flagged in a simplistic way. It's a much more visual approach"

ORGANISATION-WIDE

In Execview, organisation-wide data merges to form easy-to-read, 'meeting friendly' Scorecards and Dashboards. Executives can use these features to guide board meetings and make well informed, high-level decisions.

The Legacy Corporation stated it was vital that everybody was comfortable with using Execview. The LLDC were reassured, knowing that Execview had measures in place to ease users into the transition. "User groups, project steering groups and tailored training sessions made the transition easy.

"People have taken well to it. Because it's a web-based system, people can log in really quickly at home which is useful".

Rachel continues: "The Dashboard is really useful to present reports and information. Each area is summarised and key things you want to know are in one place. Areas of concern are flagged in a simplistic way. It's a much more visual approach.

"Directorate level dashboards are used to monitor and share information at team meetings, and the corporate dashboards are reviewed by the Executive Management Team on a monthly basis and is a set item at the Legacy Corporation's Board meetings".

Execview Dashboards display summarised information based on real data, relaying in a red, amber and green 'traffic light' style. Executives can opt to drill down into specific areas should they require more information.

Rachel explains some of the ways in which LLDC staff use Execview: "Project managers use Execview to track milestones, risks and issues. The corporate team use it as a Risk Register. Project, directorate and corporate risk registers are now all on Execview; it was invaluable for us to do this because previously, risks were held on spreadsheets. We often saw several versions saved in different locations, making it difficult to find the true latest copy. Now everything is updated in real-time and stored in one place on Execview for everybody".

CONTINUED SUPPORT AND INPUT

Execview offer consulting and ongoing training to keep users refreshed and knowledgeable on the system. "We set up regular review meetings so that service issues and suggestions can be voiced. We really like the way Execview work. Important enhancements are carried out quickly and we know that support is always available. We like that we can change the system. Execview have been very good at telling us realistically when to expect enhancements. Overall we are very happy with Execview" Rachel explains.

“People have taken well to it. Because it’s a web-based system, people can log in really quickly at home which is useful.”

If you would like to improve or establish a governance structure within your organisation, why not start a conversation? We’re on-hand to help.

A LITTLE MORE ABOUT EXECVIEW

Founded in 2003, Execview brings together a skilled and experienced team of experts able to work at the highest levels of the organisation, from Board Directors to teams throughout the business. Working in synergy with the Execview Open Governance Platform, we tailor a service that will work for your individual organisation.

The Execview platform, an Open Governance Platform (OGP), allows executives to be self-sufficient in making good governance decisions. Taking strategic outcomes from ideas through to execution and operations, Execview oversees the full business lifecycle. It continually evaluates and flags risks and compliance along the way.

Quick to set up and cloud-based, the platform is ready to go when you are. No need to change any of your existing IT systems, simply log in online and begin.

Large-scale organisational changes and day-to-day operational activities are logged and displayed via easy-to-read reports and scorecards, mixing graphical data with expert commentary and evaluations.
