

Execview's Sustainability Accreditation

- Comply with environmental protection acts & control of pollution acts
- Assign responsibility for environmental management to a specific member of staff
- Set performance targets to reduce carbon footprint and regularly monitor these
- Use data centres powered at least partially by renewable energy Use energy-efficient technology Minimise energy & water consumption by good house-keeping practices
- Procure all business practices electronically Encourage working-from-home or sustainable commuting (e.g cycling, walking, public transport)
- Give staff training about environmental issues Practice sustainability through the whole supply chain (e.g use suppliers that have environmental practices)
- Ensure services provided are at least carbon neutral, preferably helping other businesses practice sustainability

We still need to:

- Assign responsibility for environmental management to a specific member of staff
- Set performance targets to reduce carbon footprint, regularly monitor these
